

Easily Find Colleagues, Specific Resources, and Reservations

Forum mobile apps now make it easier than ever to find the people and assets needed for productivity, collaboration, and efficient operations with the addition of a Search feature on the mobile app home screen.

Quick, No Touch Check-In for Presence Verification

Capture actual utilization and presence instantly with a quick scan of a workspace or meeting room's QR Code. If the room or space has an upcoming booking when the reservation owner scans the QR Code and the space requires check-in, the mobile app will automatically check the user into the reservation. If any other user scans the QR code, they will see a schedule of that space for the day and can continue to make a future reservation.

This release also includes additional security improvements. For more information, please contact your Customer Success Team, or [reach out here](#).
